

XIII. INTERNET SAFETY

Introduction

Public access to the Internet and online services has become an integral part of the Midvale Community Library's programs and services. The intent of this policy is to meet the provisions of the Children's Internet Protection Act and Idaho Code 33-2741, as well as provide guidelines for patrons and staff regarding Internet accessible and online computer use.

It is the policy of Midvale Community Library to: (a) prevent user access over its computer network to, or transmission of, inappropriate material via Internet, electronic mail or other forms of direct electronic communications; (b) prevent unauthorized access and other unlawful online activity; (c) prevent unauthorized disclosure, use or dissemination of personal identification information of minors; and (d) comply with the Children's Internet Protection Act [Pub. L. No. 106-554 and 47 USC 254(h)].

Developed under the direction of the Board of Midvale Community Library, this Internet and Online Access Policy was discussed and adopted, following public notice required by Idaho Code, during an open meeting of the Library Board on May 8, 2012. This policy supersedes all previous Internet and Online Access Policy statements of the Midvale Community Library and is effective on May 8, 2012.

Legal Requirements

Midvale Community Library Internet Access Policy complies with Idaho Code 33-2741 Public Library – Internet Use Policy Required and with the Children's Internet Protection Act [Pub. L. No. 106-554 and 47 USC 254(h)].

Midvale Community Library has in place a policy of internet safety for minors, including the operation of a technology protection measure, hereafter called "filtering software", on any publicly accessible computer with Internet access that protects against access to visual depictions that are obscene, child pornography, or harmful to minors, as defined in I. C. 33-2741 and the Children's Internet Protection Act. The filtering software will be enforced to provide internet safety during any use of a computer.

Library policy may also limit Internet access or otherwise protect against materials other than the materials specified in Idaho Statute.

Inappropriate Network Usage

To the extent practical, steps shall be taken to promote the safety and security of users of the Midvale Community Library online computer network when using electronic mail, chat rooms, instant messaging, and other forms of direct electronic communications. Specifically, as required by the Children's Internet Protection Act, prevention of inappropriate network usage includes: (a) unauthorized access, including so-called "hacking", and other unlawful activities; and (b) unauthorized disclosure, use and dissemination of personal identification information regarding minors.

Supervision and Monitoring

Subject to staff supervision, technology protection measures may be disabled or, in the case of minors, minimized for bona fide research or other lawful purposes.

It shall be the responsibility of all members of the Midvale Community Library staff to supervise and monitor usage of the online computer network and access to the Internet in accordance with this policy and the Children's Internet Protection Act.

Procedures for the disabling or otherwise modifying any technology protection measures shall be the responsibility of the Library Director or designated representatives.

Implementation Requirements:

A notice of the availability of this Policy will be posted in a conspicuous place within the library for all patrons to observe.

The Library Board has established procedures and guidelines to handle complaints about this policy, enforcement of this policy by library staff, and what a patron should do if they observe inappropriate behavior by another library patron. A notice of the availability of these procedures for public review will be posted, as well as the policies made readily available to all staff members. These procedures and guidelines will be adhered to by library staff to enforce the requirements of Idaho Code 33-2741 and the Children's Internet Protection Act.

Effective May 8, 2012
